SKILLS

- **Full Stack Development:** Front-End Technologies (HTML, CSS, JavaScript, Tailwind, React, Next.js, GSAP, Framer Motion), Back-End Development (Python, Django REST Framework, FastAPI), Version Control (Git, GitHub), AI Tools (ChatGPT, Gemini, Copilot)
- **Soft Skills:** Problem Solving, Collaboration, Teamwork, Documentation, Communication

Experience

Full Stack Development

- Conducted E-commerce website development that improved overall user experience, made sales process easier, and boosted extra sales by 10%.
- Developed a portfolio website to showcase products, enhancing user experience and boosting client trust through clear presentation.
- Collaborated with team to develop a school project that simplified timetable management, enabled easy distribution of schedules, arranged classes efficiently, and incorporated feedback to improve overall organization.

PROJECTS

BillingKitaab | Smart billing & accounting for small businesses.

- Solved the challenge of manual paper-based billing for shopkeepers.
- Created a digital platform that simplified billing and record management.
- Enabled instant invoice generation with easy customer sharing.
- Added smart inventory and credit/overdue tracking features.
- Delivered clear benefits: faster billing, improved accuracy, and better customer experience.

SpaceFree | Smart Transport & Delivery Platform

- Addressed the issue of unused transport capacity in bikes, cars, and trucks.
- Designed a platform for providers to register routes and available space.
- Enabled users to book nearby vehicles, pay securely, and track shipments in real time.
- Helped providers earn extra income from unused space.
- Delivered benefits: affordable delivery, flexible scheduling, and transparent transport solution.

Team Work

Contribution: Actively participated in team projects, problem-solving, and delivering impactful solutions.

Awazgram | Collaborated with team to build AwazGram, a real-time complaint platform where users could capture and upload photos to report local issues.

Integrated open-source APIs to verify photo authenticity and timestamp, ensuring reliable feedback and improving transparency in community problem-solving.

StudyHive | Built StudyHive, a competitive exam platform offering AI-powered solutions and personalized mock test analysis to improve student performance.

Enabled 1:1 competition mode, creating a real exam-like environment that boosted engagement and motivated learners through direct peer challenges.
